We were one of the first advertising companies in the Gdansk region. We have been operating on the market since 1993. From the outset we have provided a full-package of advertising services. We have acquired wide experience in the advertising field and, thanks to that, we can proudly say that the majority of our customers stay loyal to us.

What we offer is a tailor-made service designed to fully satisfy the varied needs of our customers in advertising. We help to choose the most effective way of advertising, while at the same time ensuring costs are kept to a reasonable level. Our work ranges from graphic design to large professional campaigns.
